SUMMARY

Computer Science Engineering graduate with hands-on experience in Data Science, Machine Learning, Deep Learning, and Generative AI through real-world projects and internship work. Skilled in Python, SQL, Pandas, NumPy, data visualization, and predictive modeling for data-driven problem solving. Passionate about building AI-driven solutions and seeking an entry-level Data Scientist, AI/ML Engineer, or Generative AI Engineer role.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript (Basic)

Data Science & Analytics: Data Cleaning, Data Preprocessing, EDA, Data Visualization, Statistical Analysis

Machine Learning & AI: Machine Learning, Deep Learning, Generative AI, Agentic AI, Predictive Modeling

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Databases & Tools: MySQL, Git, GitHub, Jupyter Notebook, Power BI, Excel, VS Code

Core Skills: Problem Solving, Analytical Thinking, Feature Engineering, Model Evaluation

PROJECTS

Car Price Prediction System | Python | Scikit-learn

- Built a machine learning model to predict car prices using regression algorithms and real-world datasets.
- Performed data cleaning, preprocessing, feature engineering, and exploratory data analysis using Pandas and NumPy.
- Evaluated model performance and generated pricing insights using visualization and prediction techniques.

GitHub: [OIBSIP/Task2_car_price_predictor at main · sumit312-cpu/OIBSIP](#)

Spam Email Detection System | Python | NLP | Machine Learning

- Developed a spam email classifier using machine learning and natural language processing techniques.
- Applied text preprocessing, TF-IDF vectorization, and classification algorithms for spam detection.
- Evaluated model accuracy and automated email classification workflow using Scikit-learn.

GitHub: [OIBSIP/Task3_Spam_predictor at main · sumit312-cpu/OIBSIP](#)

Iris Flower Classification | Python | Scikit-learn

- Built a classification model to predict iris flower species using supervised machine learning algorithms.
- Performed data preprocessing, visualization, and exploratory data analysis using Pandas and Matplotlib.
- Evaluated classification accuracy using confusion matrix, accuracy score, and model evaluation techniques.

GitHub: [OIBSIP/Task1_Iris_Classification at main · sumit312-cpu/OIBSIP](#)

INTERNSHIP

Data Science with AI Trainee - intellipaath

November 2025 – Present

- Currently pursuing hands-on training in AI, Generative AI, Agentic AI, Machine Learning, and Deep Learning through Intellipaath.
- Working with Python, SQL, Pandas, NumPy, and Scikit-learn for data analysis, preprocessing, and predictive modeling.
- Building machine learning and AI projects involving classification, prediction, NLP, and exploratory data analysis (EDA).
- Practicing Deep Learning and Generative AI concepts for developing intelligent and data-driven solutions.
- Developing dashboards and visual reports using Power BI, Excel, Matplotlib, and Seaborn for insight generation.
- Using Git, GitHub, and Jupyter Notebook for project development, experimentation, and workflow management.

EDUCATION

• Bachelor of Technology (B.Tech) — Computer Science Engineering
Jawahar Lal Nehru College of Technology (JNCT), Rewa, Madhya Pradesh

June 2021 – May 2025

CGPA: 7.95

• Higher Secondary Education (Class XII)
Govt. Higher Secondary School, Shahpur Vritta

June 2020 – May 2021

Percentage: 84.8%

• High Secondary Education (Class X)
Govt. High Secondary School, Shahpur Vritta

June 2018– May 2019

Percentage: 86.4%

CERTIFICATION & ACHIEVEMENT

- Data Science Internship Certificate – Oasis Infobyte
- Certification in Data Science with AI – Intellipaath
- Problem-Solving Excellence – Solved 100+ coding and problem-solving questions using Python and SQL.
